Student Name: Sumedh Vats
Branch: CSE
Semester: 5th
Subject Name: ADBMS

UID: 23BCS11261
Section/Group: KRG 1-B
Date of Performance: 30/10/2025
Subject Code: 23CSP-333

1. Aim: Perform CRUD Operations using No-SQL Database: MongoDB

2. Objective:

- Create and manage databases and collections.
- Perform **CRUD operations** — Create, Read, Update, and Delete documents.
- Use **aggregation** for grouping and summarizing data.
- Understand how to modify, query, and manage collections efficiently in MongoDB.
- Gain practical experience with real-world data handling through command-line operations.

3. Code:

```
// 1. Show all databases
```

```
show dbs
```

```
// 2. Create or switch to your database
```

```
use db_sumedh
```

```
// 3. Check current database
```

```
db
```

```
// 4. Create a collection (optional)
```

```
db.createCollection("movies")
```

```
// 5. Insert Operations
```

```
db.movies.insertOne({ t
```

```
itle: "Inception",
```

```
director: "Christopher Nolan",
```

```
year: 2010,
```

```
rating: 8.8,
```

5. Learning Outcomes:

- Understand the structure and working of MongoDB as a NoSQL database.
- Create and manage databases and collections using MongoDB commands.
- Perform CRUD (Create, Read, Update, Delete) operations on documents.
- Apply aggregation operations for data grouping and analysis.
- Gain practical skills in handling and modifying data using MongoDB shell.
