

Worksheet 10

Student Name: Sumedh Vats
Branch: CSE
Semester: 5th
Subject Name: ADBMS

UID: 23BCS11261
Section/Group: KRG 1-B
Date of Performance: 30/10/2025
Subject Code: 23CSP-333

1. Aim: Perform CRUD Operations using No-SQL Database:MongoDB

2. Objective:

- Create and manage databases and collections.
- Perform **CRUD operations** — Create, Read, Update, and Delete documents.
- Use **aggregation** for grouping and summarizing data.
- Understand how to modify, query, and manage collections efficiently in MongoDB.
- Gain practical experience with real-world data handling through command-line operations.

3. Code:

```
// 1. Show all databases
show dbs

// 2. Create or switch to your database
use db_shivanshu

// 3. Check current database
db

// 4. Create a collection (optional)
db.createCollection("movies")

// 5. Insert Operations
db.movies.insertOne({ title: "Inception",
  director: "Christopher Nolan",
  year: 2010,
  rating: 8.8,
```

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

```
genre: "Sci-Fi",  
features: ["Mind-bending", "Action"],  
added_by: "Shivanshu"  
})  
  
db.movies.insertMany([  
  {  
    title: "Interstellar",  
    director: "Christopher Nolan",  
    year: 2014,  
    rating: 8.6,  
    genre: "Sci-Fi",  
    features: ["Space", "Drama"],  
    added_by: "Shivanshu"  
  },  
  {  
    title: "Avatar",  
    director: "James Cameron",  
    year: 2009,  
    rating: 7.8,  
    genre: "Adventure",  
    features: ["3D", "Action"],  
    added_by: "Shivanshu"  
  },  
  {  
    title: "The Dark Knight",  
    director: "Christopher Nolan",  
    year: 2008,  
    rating: 8.9,  
    genre: "Action",  
    features: ["3D", "Action"],  
    added_by: "Shivanshu"  
  }])
```

```
{ $group: { _id: "$genre", total_movies: { $sum: 1 } } }
```

```
)
```

```
// 11. Drop collection
```

```
db.movies.drop()
```

```
// 12. Drop database
```

```
db.dropDatabase()
```

4. Output:

```

5. Learning Outcomes:

- Understand the structure and working of MongoDB as a NoSQL database.
- Create and manage databases and collections using MongoDB commands.
- Perform CRUD (Create, Read, Update, Delete) operations on documents.
- Apply aggregation operations for data grouping and analysis.
- Gain practical skills in handling and modifying data using MongoDB shell.
